Google

You can now help magydocs@gmail.com when they have trouble signing in

G godspiritmindcomplex@gmail.com

As a recovery contact, when magydocs@gmail.com needs help signing in, they'll be able to ask you.

How recovery contacts help
You'll get an email or notification and need to take these steps:

1. **Connect with them by phone** to confirm they need help signing in.
2. **Ask them for the number** we have given them.
3. **Follow the prompts on your device and confirm the number** to let us know it's really them signing in.

You can remove yourself as their recovery contact or manage your own recovery contacts at any time in your Security Settings.

Go to Settings

You received this email to let you know about important changes to your Google Account and services.
